- Garden Waste Removal
- Green Waste Removal
- Commercial Waste Removal

Rubbish Removal Canberra

Let's be honest. You've probably got a million better things you can think of that you would probably prefer to do than get your **junk removed**. Time with family, time with friends. Even time alone by yourself on the sofa with a good movie on the TV. Removing all the rubbish and junk that is normal household clutter takes time and a whole lot of effort. It's hard work, it's dirty work, and it's work you

don't want to do.

But we do. At CBR Rubbish Removal, we like hard work; we even like the dirty and tedious work. We like the big jobs, and we like the small jobs. Let us do the hard work for you, so you can do whatever you want to do.

About Us

We at **CBR Rubbish Removal**, work with experienced contractors in the **rubbish and junk removal** fields, to get your job done, regardless of how big or small it might be. We know how to get rid of rubbish quickly and safely; we will **recycle** as much as possible, and **dispose** what can't be recycled correctly and ethically as per council laws.

From simple appliance removals, to garden waste, from mattresses to refrigerators, from a garage spring clean to an end-of-lease clearout, we do it all. Whether for **commercial** or **personal rubbish removals**, the office or for real estate agencies, we offer a reliable, cost-effective, efficient and on-time garbage collection and removal service with a friendly smile, and affordable prices.

We are fully insured and we are fully committed to provide the standard of rubbish removal you deserve to the city of Canberra and to all of the ACT.

We've all thought it – "I'll throw it out one day" – and then suddenly, it's a year or two later, and you've accumulated so much garbage and junk that entire rooms have been conscripted to store it. And now, what was once a simple task has become too big for you to do alone. You don't have the time, you don't have the energy, and you don't have the capability to do it all yourself.

Which is where we come in. Our team of professional **Rubbish Removalists**, can collect and remove all of that old garbage for you, no worries, leaving behind what you have always wanted ... your space back to do with as you wish.

So What Can You Remove?

Well ... what do you have?

Our **garbage collection** and **removal service** can take care of whatever junk you have. Wherever it is, however big it is, we can get it out. We may need to dismantle or demolish it beforehand, but we can get rid of it.

Whatever it is – furniture, beds, exercise equipment, doors, carpets, appliances big and small, and many things more than we can list here – we can get rid of it all. And if we are able to, we will **recycle** your junk; if we can't recycle, we will **dispose** of it appropriately.

Do You Only Do Big Jobs?

No, we'll do whatever task you put before us.

Maybe you've had a birthday party, and now your living room looks like a tornado's gone through it; or you've hosted a garden party that got a little too boisterous and you just don't want to deal with the mess left behind.

Maybe it's as simple as your bins are overflowing, and you are mobility impaired and just can't empty them properly. The reasons are not important. What is important is that we want to help get your life back on track by getting out of the house what you no longer want in it.

Do You Only Do Domestic Jobs?

No. We work with both **domestic** and **commercial rubbish removal** jobs. If you need to do an **Office Clean Out**, call us. If you are a renter and need to get rid of junk before you move out, call us. If you are a Real Estate Agent and need to perform an End-of-Lease Clean Out, call us. We do Deceased Estate Clean Outs and Construction Debris Rubbish Removals as well.

OUR SERVICES

We do pretty much anything. Well, almost anything. Unfortunately, we're not equipped or licenced to remove asbestos, hazardous waste, or chemicals, so if your job requires the elimination of such substances, you will need to find a licenced removalist contractor in that field.

However, the services we do supply are numerous. Even so, perhaps you aren't finding the specifics of what you require in the list below. No worries – give us a call or fill in our quote form and select 'Other', and you'll hear from us very quickly.

Furniture Removal

So, you have a table you no longer need, or your kids broke their bed by jumping up and down on it too much. Maybe there's a wardrobe that's seen better days or a collapsing desk or broken dinner chair you are too scared to use for fear of pain. That's where we come in. Think of us as Reverse Santas. Give us a call, and leave the [furniture disposal](#) to us. We'll come and safely take all that stuff away, careful to leave your house clean and tidy.

Bed and Mattress Removal

Did you know mattresses can be recycled. They are one of the most common items sent to landfills, but they don't need to be, especially since **mattress recycling** is such an easy option. And, if your mattress is in good enough condition, they can be cleaned up and donated to charities. Give us a call, and we can make your [mattress disposal](#) easy and painless.

E Waste Removal

It's one thing removing computers or other types of [electronic waste](#); the disposal of them is something else. Sometimes it's not just as simple as dumping them at the rubbish tip. Leave the worry to us. We will remove all of your old and broken computers, electronics and appliances and dispose of them as appropriate; **recycling** them, if possible. Give us a call, and leave the worry to us.

White Goods Removal

Fridges and **washing machines** and the like are amazing inventions – what would we do without them - but when they break down, it becomes more 'What do we do with them?' They're big, they're heavy, they're bulky ... and you can't be blamed thinking 'How do we get rid of them? I don't have a trailer.' Well, we do. You don't need to worry about how to move and dispose of your fridge, washing machine, dish washer or any other large, [bulky white goods](#) appliance. That's our job. Give us a call, and we'll get that done for you.

Garden and Green Waste Removal

Just had a big storm and your yard is a mess? Branches down, palm fronds, piece of debris scattered everywhere? Or perhaps you've simply gone on a gardening spree; lopped some trees here, trimmed some hedges there. Or you've knocked down the swing set to put in a new shed. Whatever it is, if you have junk in the yard, we can get rid of it. Give us a call, and we'll leave your [yard clean](#) and fresh.

Commercial Rubbish Removal

Moving out of your office? Clearing out your shop or other place of business? Make sure we're your first call for all of your [commercial waste management](#) and **junk elimination** needs. From computers to office furniture, from paper waste to plastic, from shop fittings to **green waste** ... we can help. Give us a call; we will remove your rubbish quickly, hassle free.

Furniture Removalists Canberra

Picture

Furniture breaks down. You can tape it up, glue it together, stitch up broken seams, tinker with it all you want, but sooner or later, it will fall apart. Or perhaps what looked cool and trendy when you were a young adult is no longer quite so practical when you have a three year old with constantly sticky and dirty fingers. Whatever the reason, there will come a time when you need to replace the old with the new, and then what do you do with the old?

Like a lot of junk, old chairs and tables and the like end up in a store room. Or maybe you can't even get it to a store room, and it sits in the corner of the living room, taking up space because no one likes using it or going near it. Maybe it smells a bit funky. Whatever the case, getting rid of it can be difficult, overwhelming and stressful. How do you get the really big pieces out the door? How do you get it to the dump? Where does it go once you're at the dump? Can you just recycle it?

But it doesn't have to be stressful, because you don't have to do it. That's why we are here; at CBR Rubbish Removal, we will take it all, alleviating you of all fuss, stress and worries.

Types of Furniture

If you can sit on it, sleep on it, put clothes in it, put food on it, and much, much more, we can remove it. So that's things like beds, chairs, cupboards, wardrobes, sofas, couches, lounges ... well, you get it.

Avoid all the hassles, worries and the backache of carrying heavy wardrobes down the stairs, or getting large tables through narrow doorways and let us do it. We know how to remove all that stuff safely and without risk of damage to your property. We will recycle whatever we can, or dispose of appropriately whatever we can't.

You might think saving a few dollars and removing your broken old furniture yourself is the smart thing. And, fair enough, in these current tough days, the old saying: 'A Dollar Saved Is A Dollar Earned' rings true.

But trying to carry a heavy piece of furniture like a sofa chair, or a student desk down a narrow flight of stairs is not a walk in the park. The risks to damaging your walls and other pieces of furniture are high if you don't know what you are doing. And that's not to mention the risks you take with your own health. Lifting heavy objects incorrectly can cause lasting pain to your back. Tripping on the top step with a bulky piece of furniture in your hands can cause you months of pain.

At CBR Rubbish Removal, we are trained to know just how to move any and all bulky pieces of furniture from any and all locations. Do you have a marble

benchtop stored in your attic? We can carry that out for you. Do you have a bed frame that you are sure you need to bend in two to get down the labyrinth of hallways and stairs? Let us do that.

Choose Us For All Your Furniture Removal Needs

Certain furniture can be large and bulky, and maybe you don't have people to help you move. And sometimes, if it's big, it might need to be demolished to get it safely through the door, and maybe that is something you don't have the time or the tools to tackle. Take the worry out of it, and allow us to help you. We have the team, we have the knowledge and we have the tools to do the task properly.

Bed and Mattress Removal Canberra

We spend more time on our beds than we do on anything else. Over the years, the frames sag, stretch, buckle and fail, until such a time comes when you have to buy a new one. So, what do we do with the old frames? If you're like many people, you hide them away, because they are large and cumbersome and difficult to move around. They take up space, space that can be better used for other things.

And mattresses are worse. They are breeding grounds for bacteria and mold, dust mites and bed bugs. But the biggest problems with them is that you can't just throw them out. There are laws that dictate what you can do with them to dispose of them.

Disposal of Old Mattresses

Fortunately, at CBR Rubbish Removal, we know what to do. We can safely pick up and remove your bed frames and mattresses, without damage to yourself or your walls, floors and doors. If possible, we will recycle what we can, provided they match certain criteria, and dispose of what we can't recycle in the appropriate locations.

Did you know just how much of a mattress can be recycled? 70 percent of it, in fact.

You have the springs, which can be melted down by scrap metal dealers and used in building and roofing solutions, cars and appliances.

Then there's the foam and latex which are supposed to make you feel like you are lying on a cloud (only now, the 'cloud' might feel a bit lumpy). They can be recycled into products like carpet underlay.

And any recovered timber becomes woodchips, and perhaps ironically, what was once a part of your bedding, can now be used in making animal bedding.

Do not take your mattresses to the dump and just leave them there to rot. Let us handle the mattress disposal quickly and easily by taking them to a Mattress Recycling Centre.

Appliances and E Waste Removal Canberra

Sometimes it seems that appliances breed. You close your eyes for a few minutes, and there is some knew thingamajig taking up room, cluttering up your benchtop.

And they break down as soon as the warranty's over, becoming a new entry to the every growing pile of junk in your storage room.

Now let's talk about computers and phones and iPads and all the other electronic gizmos that captivate our attention until some new 'in' thing comes along that we must all have!

Very soon we have so many electronics littering the house, most of them made obsolete by other electronics that will some become future household space fillers, and we need to get rid of them just to see our benchtops and kitchen tables again.

Some of them might be small, but some, like big screen TVs, can be large and bulky, and a real hassle to move around.

And the problems don't end when you get them out your door; sometimes disposing of the things isn't as easy as just throwing them into the tip. Maybe they can be recycled; maybe they need to be broken down; maybe they are hazardous. Let us worry about all that.

Types of Junk We Can Remove

Well ... if you got it into your house, we can get it out. From the big - such as big screen TVs, microwaves, computers, printers - to the small - iPads, phones, any tiny little thing your kid stares at instead of trying to have a conversation with you; we can remove them all.

We don't want to see you get hurt. Some Appliances and E-Waste can be large and heavy. Lifting them incorrectly can cause you chronic back pain.

And even if you can manage to lift without causing pain, managing steep stairs and narrow passageways is difficult, and without proper experience in moving large, bulky equipment, you may cause more damage to your walls and doors and other furniture, than you saved by not having a professional come in and do it for you.

The health and safety of you and our team is our highest priority. We know how to move large bulky items, because we've done it many times before.

White Goods Removal Canberra

Fridges can weigh 100 kilograms or more. Trying to move that on your own can be extremely dangerous, and potentially very costly. And getting them through doors and down stairs? Forget about it. Save yourself a sore back – or worse – by calling in the guys who do this for a living. We will ensure a quick and simple removal of all your whitegoods items, making doubly sure not to damage your home in the process. And once out of your home, we will recycle as much of the item as possible, and dispose of appropriate that which can't be recycled. Throw away your bulky broken white goods, reclaim the space.

Types of White Goods We Can Remove

Whatever the size or bulk of the appliance, we can remove it. It's what we do, and we are very good at what we do. Stuff like fridges, freezers, washers and dryers, ovens, stoves, rangehoods, cooktops, dishwashers, microwaves and old air conditioners; we can remove them all.

We've probably missed a few, and if we have, that's ok; call us and get a free quote. At CBR Rubbish Removal, there is no white good too large and bulky that we can not remove.

White Goods are some of the biggest, heaviest, bulkiest appliances in your house. And, in these tough financial times, it is understandable if you want to

save a little money and just move out your old, unwanted fridge, freezer or washing machine yourself.

But, please, re-consider. Unless you are a weight-lifter, or a front-row forward for the Canberra Raiders, let the professionals take on the hassle of moving these bulky items.

And even if you are a weight-lifter, or front-row forward, there is still no substitute for experience. We know how to move large, heavy, bulky items through tight, constricting passageways, and down narrow stairs safely and without damage to you or your property.

It just makes sense to call in the removal experts for certain removal jobs. We will ensure that your White Goods are removed safely and without damaging your property, and will be recycled if applicable, or disposed of appropriately, if not.

Garden and Green Waste Removal Canberra

Back yard waste piles up quickly. You decide to trim a few hedges, clip a few trees, perhaps clean up the bamboo, knock down a wooden fence, or dig up old turf ... it doesn't seem to take long before the rubbish is overwhelming.

So, what do you do? You could splash out for a skip, but you still need to do the work, picking up all the junk, carrying it to the skip, hour after hour, all the while getting dirtier and dirtier, bug bites, sun burn and tired.

Or ... you could call us and we could do it for you. You just point out what needs to be removed and we'll take it. We'll save you time, and a lot of effort.

Types of Garden and Green Waste

Let's put it simply; if it's in the back yard and you don't want it there anymore, it applies. That includes stuff like weeds, grass clippings, branches, shrubs, earth and dirt; stuff that is the by product of a good clean out.

But that's not all; we'll remove any leftover turf from your lawns, any bamboo, palm fronds and leaves, wooden pallets, and fences, whether chain, wire or timber.

We'll move large rocks that you can't move by yourself, stumps you may have dug up, garden beds, retaining walls, clotheslines, greenhouses and sheds, kids' tree or cubby houses, swing sets and trampolines.

There is so much we are willing to remove, that even we can't name them all. Give us a call, and get a free quote.

Waste that can degrade should not be thrown away in the everyday rubbish, or left out on the street waiting for pickup.

Such waste should be recycled, or at least allowed to breakdown and degrade in a responsible way, and then repurposed and reused.

Allow us to remove such garden, organic and green waste items from you and dispose of them responsibly. Grass, flowers, tree cut-offs, shrubs, plants, and even larger items like tree branches and tree trunks; all of them come under the banner of Green Waste.

Commercial Waste Removal Canberra

Most businesses produce a lot of waste, and for most businesses, the removal of waste is not number one on their 'Things To Do' list. But rubbish removal is a safety and health concern, and a clean worksite is a major requirement for most businesses.

At CBR Rubbish Removal, we want to help businesses such as yours with their rubbish removal requirements; we have an experienced team who've helped many people before with their waste issues, and we will provide a knowledgeable, professional outlook to your waste removal needs.

Why not hire a skip, then, you might ask? Well, you could, but that would still be a lot of work. You would have to haul the junk out from wherever it resides to wherever you parked the skip, and that might mean navigating stairs and doors and escalators with things that might be heavy and dangerous to carry.

And even when you get the stuff to the skip, do you just dump it all in the skip, which will then be dumped blindly into the tip, or do you sort out the junk into what can be recycled and what can not. That is a lot of time and effort. You've got better things to do with your time, particularly when we can do that ourselves quicker and safer than you.

Plus, we will sort out your material into what can be recycled and what cannot, and recycle that which can be recycled, and dispose of that which cannot. So, it is also healthier for the environment if you just let us do it for you?

Types of Businesses We Work With

Well, we work with any business that produces rubbish ... which is probably all of them. But Offices, Shops, Restaurants, Food Outlets, Government Departments, Hospitals or Medical departments, Schools and other educational institutions like universities and training centres are but a few.

By looking through this website, you can see the various different services that we supply, all of which are available to commercial businesses as well. But specifically for businesses we would:

- Clear out retail shops after a refit.
- Recycle office equipment like computers, photocopiers, screens and printers, and many more such items.
- Remove shelving units and metal stands, bookcases, shop fixtures.
- Dispose of Office partitions, cubicle fixtures such as chairs and desks.
- Clear out old medical equipment.
- And much more.
